Blood meal for compounding animal feeds- Specification
TECHNICAL COMMITTEE REPRESENTATION

The following organizations were represented on the Technical Committee:

Ministry of Livestock Development — Department of Livestock Production
Department of Veterinary Services

Kenya Meat Commission
Joeliz Bone meal Ltd
Unga Farm Care (EA) Ltd.
Government chemist
Consumer Information Network
Kenya Agricultural Research Institute (KARI)
Proctor and Allan EA Ltd.
AKEFEMA-Association of Kenya Feed Manufacturers
Pembe flour Mills ltd
Pioneer Feeds Ltd
University Of Nairobi
Kenya Bureau of Standards — Secretariat

REVISION OF KENYA STANDARDS

In order to keep abreast of progress in industry, Kenya Standards shall be regularly reviewed. Suggestions for improvements to published standards, addressed to the Managing Director, Kenya Bureau of Standards, are welcome.

Copyright. Users are reminded that, by virtue of section 6 of the Copyright Act, Cap. 130 of the Laws of Kenya, copyright subsists in all Kenya Standards and except as provided under section 7 of this Act, no Kenya Standard produced by Kenya Bureau of Standards may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from the Managing Director.

Permission may be conditional on an appropriate royalty payment.

Care should be taken to ensure that material used is from the current edition of the standard and that it is updated whenever the standard is amended or revised. The number and date of the standard should therefore be clearly identified.

The use of material in print or in electronic form to be used commercially with or without payment or in commercial contracts is subject to payment of a royalty.
Blood meal for compounding animal feeds-
Specification
FOREWORD

This Kenya Standard for blood meal was prepared by the Animal Feeds Technical Committee with the guidance of the Project Standards Committee.

Blood meal is an important protein supplement as it contains as much as 85 per cent protein, including large amounts of lysine, tryptophane and methionine. It is used as protein concentrate in animal feeds as it contains practically no fibre and allows the animal a higher protein intake without increasing the volume of feed. To ensure its quality, blood from slaughtered animal should be processed within the shortest time to avoid contamintion.

It is anticipated that this standard will assist manufacturers of blood meal and animal feeds to maintain good quality and exercise proper quality control during production.

During the preparation of this standard, references were made to the following publications.

- The Fertilizers and Animal Feedstuffs Act, Cap 345.
- MS: 3.67: 1976 Specificaiton for blood meal as an animal feed supplement.

Acknowledgement is made for the assistance received from these sources.
KENYA STANDARD

BLOOD MEAL FOR COMPOUNDING ANIMAL FEEDS- SPECIFICATION

1. SCOPE

This Kenya Standard prescribes the requirements for blood meal used as protein supplement in compounding animal feed for non ruminants.

2. DEFINITIONS

Blood meal shall be the product obtained by steaming fresh, clean blood at 100 °C for 15 min to 25 min to destroy pathogenic micro-organisms and then dried.

3. GENERAL REQUIREMENTS

3.1 Blood meal shall be free from rancidity, any objectionable odour, toxic ingredients, adulterants, foreign matter, insects and pathogenic micro-organisms.

3.2 Blood meal shall conform to the requirements prescribed in Table 1.

4. Microbiological requirements

4.1 Blood meal shall be free from salmonellae, spores of Bacillus anthracis and Clostridia when tested according to the method prescribed in KS 01-63: Part 3*
5. **PACKAGING AND LABELLING**

5.1 **Packaging**

5.1.1 Compounded Blood meal for sale shall be packed in containers which are of sufficient strength and sufficiently sealed so as to withstand reasonable handling without tearing, bursting or falling open during normal handling and transportation.

5.1.2 Each container for Compounded Blood meal shall be clean and free from visible indications of contamination, infection and insect infestation.

5.2 **Labelling** — the packages shall be securely closed and marked with the following information:

(i) Name of product; ‘Blood Meal’;

(ii) Category of animals for which it is intended;

(iii) Net Weight of the product;

(iv) Batch number;

(v) Name and physical address of the manufacturer;

(vi) Date of manufacture and expiry

(vii) Protein content as per cent in the product.

(Viii) Instructions for use and storage
