When two or more countries have the equal cost of producing the product, a country achieved the last process of manufacturing a cosmetic product obtains the origin.

5.4 Nominal content of the product. The nominal quantities shall be expressed in UI standards units of weight or volume. The nominal content information is exempted in the following cases: for products containing less than 5ml or 5g, single-application products, free samples.

5.5 The time period, from the date of manufacturing, the cosmetic product shall fulfil its initial requirements and complies with the article 4.2 provided it is stored at the stated conditions. This can be expressed by any one of the following options depending on the situation:

5.5.1 Product(s) deteriorating within 30 months from the date of manufacturing: In this case, "date of minimum durability" also known as "Expiry date" shall be clearly expressed in the order of month and year (or) the day, month and year. If necessary, this date shall be accompanied by conditions that must be satisfied in order to guarantee the stated durability. This date shall be preceded either by the phrase "best used before the end of" or by the abbreviation "Exp." or the letter "E" or by the symbol (1) shown in the Fig1 of Annex 7.

This time period shall be indicated by the symbol, shown in Fig2 of Annex 7, and it can occur either inside or outside of the symbol.

5.5.3 The declaration of time period after opening is not relevant in the following cases:

- a) Products presented in containers where there is no need of physical opening and there is no possibility of contact between the product in the container with the external environment (e.g. sealed pressurized containers)
- b) Single-application products.
- c) Products with a low microbiological contamination risk such as those with $\text{pH} \geq 10.0$, $\text{pH} \leq 3.5$, high alcohol content (e.g. perfumes, eau de cologne, ...)

5.6 Conditions of use, Warning Statements and precautionary information shall clearly expressed on the label and the following should be considered:

5.6.1. Conditions of use and warnings for a range of ingredients listed in the Annexes 3 to 6 column 1 must be printed on the label of both the container and the packaging. Additionally any other information deemed necessary for the safe use or disposal of the product must also be provided.

5.6.2 These requirements also apply to products intended for professional use, in hairdressing in particular, and careful consideration should be given as to how the product is used and whether there is increased risk due to prolonged exposure or more unusual conditions of use.

5.6.3 Where it is impossible for practical reasons to print this information on the label, the information shall be mentioned on an enclosed or attached leaflet, label tape, tag or card. This shall be referred to either by abbreviated information or by the "hand-in-book" symbol (3) in annex 7, which must appear on the container or packaging.

5.7 Batch Number or Lot Code. A code which enables the manufacturer or supplier to identify the batch in which the product was manufactured must be marked on both the primary container and outer packaging. If the product is not made in a batch, then the code should enable the date and place of manufacture to be identified. Where it is impossible for reasons of size for the lot code to appear on both the primary container and outer packaging, it may appear on the outer packaging alone.

5.8 Product Function. The function of the cosmetic product should be clearly printed on the container and on the packaging, unless it can be spontaneously and obviously deduced from a combination of:

- The product presentation (shape, size and volume) e.g. lipstick

Moreover, the presence of substances, the mention of which is required under the column 'Other' in Annex 3, shall be indicated in the list of ingredients in addition to the terms parfum or aroma.

5.9.2 The list of ingredients shall be established in descending order of weight of the ingredients at the time they are added to the cosmetic product. Ingredients in concentrations of less than 1 % may be listed in any order after those in concentrations of more than 1 %.

5.9.3 All ingredients present in the form of nanomaterials shall be clearly indicated in the list of ingredients. The names of such ingredients shall be followed by the word 'nano' in brackets.

5.9.4 Colorants other than colorants intended to colour the hair may be listed in any order after the other cosmetic ingredients. For decorative cosmetic products marketed in several colour shades, all colorants other than colorants intended to colour the hair used in the range may be listed, provided that the words 'may contain' or the symbol '+/-' are added. The CI (Colour Index) nomenclature shall be used, where applicable.

5.9.5 An ingredient should be identified by its common name that is its INCI name, as listed in the common ingredients nomenclature of the European Union. In the absence of an INCI name, any of the following means of identification may be used: chemical name; European Pharmacopoeia name; International non-proprietary name as recommended by the World Health Organization; EINECS number, IUPAC nomenclature or CAS identification reference; or colour index number.

5.9.6 Where it is impossible for practical reasons to print this information on the label, the information shall be mentioned on an enclosed or attached leaflet, label tape, tag or card. This shall be referred to either by abbreviated information or by the "hand-in-book" symbol (3) in annex 7, which must appear on the container or packaging. Where it is impracticable to label that abbreviated information or the symbol, they may be omitted.

5.9.7 For cosmetics and personal care that are supplied in neither a container nor packaging and whose size, shape or texture makes it impractical to provide ingredient information as detailed above, the information may be given on a notice or leaflet in close proximity to the product offered for sale. In this case, the hand-in-book symbol is not needed on the package.

5.10 The information required by (Article 5.1 to 5.8) must appear on the label of both the container and the packaging of each individual cosmetic product.

6.3 Hotel Amenities are subject to all of the requirements of this standard. However, full use can be made of the exemptions to ingredient labelling given for difficult shapes and small packs. For example, it is acceptable for the ingredient information to be given on a leaflet or card which can be placed close to the product where the standard allow this.
